

Tebal EL SOKHNA
Spectrum of Emotions

SPECTRUM *OF EMOTIONS*

Our perception of a color is formed when an object reflects a certain wave length of the white light hitting it. Similarly, we reflect a certain emotion when we are hit by a color.

For example: serenity with blue, energetic with orange, calmness with green and love with red. It's a spectrum of human emotions that only colors can materialize to our eyes.

At Jebal we understand this spectrum and manifest that in a unique destination, a place where mountains hug the red sea separated only by a sandy strip of beach, a beacon where all sorts of human emotions can nourish, a place that captures both spectrums of colors and emotions.
